EXPERIENCE

2022 - Now

Senior Software QA Engineer

Ford Motor Company / United States, Dearborn, MI

- Lead a team of QA engineers in the design and execution of test plans for web and mobile applications.
- Develop and maintain automated test scripts using Selenium WebDriver and Python.
- Perform manual testing for various projects, ensuring compliance with user requirements and functional specifications.
- Collaborate with cross-functional teams to identify, document, and resolve defects.

2018 - 2022

Software QA Engineer

General Motors / United States, Detroit, MI

- Created detailed test plans, test cases, and test scripts to ensure complete coverage of requirements.
- Automated repetitive test cases using Java and Selenium, reducing manual testing efforts.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of an Agile development team.

2017 - 2018

Junior Software QA Engineer

Quicken Loans / United States, Detroit, MI

- Assisted in the creation of test cases for web applications.
- Performed manual testing to identify defects and ensure software functionality.
- Participated in code reviews and provided feedback on potential quality issues.
