

Salesforce Developer

Dennis Pearce

Professional summary

Results-driven Salesforce Developer with over 8 years of experience in customizing Salesforce applications, building scalable solutions, and optimizing system performance. Adept at working within Agile environments, integrating Salesforce with third-party systems, and developing custom Apex code and Lightning components.

Experience

Salesforce Developer

March 2021 - Now

Tech Solutions Inc. / Austin, TX

- Develop and implement custom Apex classes and triggers to support complex business processes, resulting in a 20% reduction in manual data entry errors.
- Create and deploy Lightning Web Components to enhance user experience and streamline data input forms, improving user adoption by 30%.
- Integrate Salesforce with external systems using REST APIs, enabling real-time data synchronization and improving operational efficiency.
- Lead the migration of legacy Visualforce pages to Lightning Experience, enhancing performance and user interface consistency across the platform.

Salesforce Developer

June 2018 - February 2021

InnovateCorp Ltd. / Austin, TX

- Designed and built custom Salesforce applications using Apex and Visualforce to meet unique business requirements, improving customer relationship management by 25%.
- Implemented automated workflows and process builder processes to streamline operations and reduce manual intervention, leading to a 15% increase in productivity.
- Developed integration solutions using SOAP and REST APIs to connect Salesforce with third-party applications, enhancing data accuracy and accessibility.

Junior Salesforce Developer

August 2016 - May 2018

NextGen Technologies / Austin, TX

- Assisted in the customization and configuration of Salesforce Sales Cloud and Service Cloud to fit organizational needs, improving overall system functionality.
- Wrote and tested Apex code and SOQL queries for various reporting and data manipulation tasks, ensuring reliable and efficient data retrieval.
- Supported data migration projects by developing ETL processes and validating data integrity, successfully completing multiple large-scale migrations with minimal disruption.
