Experience with Python, C++, and SQL Expert

Effective in data-driven decision-making Expert

PROFESSIONAL SUMMARY

Analytical and detail-focused Systems Designer with a strong foundation in designing game mechanics and balancing systems. Deep expertise in progression systems, economy balancing, and player feedback loops.

EXPERIENCE

July 2022 - Now

Systems Designer

Ubisoft / United States, New York, NY

- Design and balance economies, including in-game currency, progression systems, and item rewards to boost player retention.
- Collaborate with analysts to analyze player data and conduct extensive playtesting to improve system balance.
- Implement adjustable difficulty scaling to suit various player skill levels.
- Develop monetization strategies that prioritize player satisfaction and fair play.

April 2021 - June 2022

Junior Game Designer

King Games / United States, Brooklyn, NY

- Contributed to core mechanic design, balancing item drop rates and reward systems for mobile games.
- Conducted QA testing to identify balance issues within gameplay mechanics.
- Analyzed player feedback to make iterative improvements to systems.
