- Frameworks & Libraries: Spring Boot, Hibernate, JPA, REST APIs
- Database: MySQL, MongoDB
- Tools: Git, Maven, Jenkins, Docker
- Cloud & DevOps: AWS (EC2, S3), CI/CD with Jenkins
- Other: Microservices architecture, Unit testing (JUnit, Mockito)

LANGUAGES

- English (native)
- Spanish (conversational)

PROFESSIONAL SUMMARY

Results-oriented Java Developer with 5+ years of experience in designing and developing high-performance applications, primarily using Java, Spring Boot, and RESTful APIs. Skilled in collaborating with cross-functional teams to deliver robust, scalable solutions. Proven track record of optimizing back-end processes and improving system efficiencies.

EXPERIENCE

2023 - Now

Java Developer

Seattle Software Solutions, Seattle, WA /

- Develop and maintain RESTful APIs using Java and Spring Boot for a high-traffic B2B e-commerce platform, resulting in a 20% increase in system performance.
- Collaborate with front-end teams to integrate back-end functionality, ensuring seamless customer experiences.
- Write unit tests using JUnit and Mockito, achieving 95% code coverage across several key modules.

2021 - 2023

Software Developer

TechWave Solutions, Austin, TX /

- Worked on a microservices-based architecture for a cloud-based financial services application, focusing on the user account and transaction modules.
- Utilized Spring Boot and Hibernate to build data-heavy modules, managing transactions efficiently and ensuring data consistency.
- Collaborated with DevOps to set up CI/CD pipelines on Jenkins, significantly reducing deployment times and enhancing testing automation.

2020 - 2021

Junior Java Developer

CodeCraft Inc., Denver, CO /

- Developed and tested small features for a CRM application, primarily handling bug fixes and code enhancements.
- Gained hands-on experience in Agile development and participated in daily stand-ups, sprint planning, and retrospective meetings.
- Assisted in the transition from monolithic to microservices architecture, supporting the back-end team by breaking down modules into individual services.
