EDUCATION

2014 - 2018

Bachelor of Science in Computer Science

Indiana University of Pennsylvania, United States

Microsoft Certified: Data Analyst Associate

March 2021

PROFESSIONAL SUMMARY

Detail-oriented and creative Power BI Dashboard Developer with experience designing and optimizing interactive dashboards and reports. Skilled in data visualization, DAX, and Power Query to deliver actionable business insights. Adept at collaborating with cross-functional teams to meet business requirements and support data-driven decision-making processes.

EXPERIENCE

Power BI Dashboard Developer

2021 - Now

Tech Solutions, United States, Philadelphia, PA

- Design and develop over 30 interactive Power BI dashboards to track KPIs, performance metrics, and business operations for various departments.
- Collaborate with business stakeholders to gather requirements and transform raw data into visually appealing, easy-to-understand reports and dashboards.
- Utilize DAX and Power Query to optimize calculations, ensuring fast report load times and accurate data representation.
- Implement role-based security to ensure data confidentiality and enable personalized report views for different departments.

Junior Power BI Developer

2018 - 2020

Data Analytics Inc., United States, Philadelphia, PA

- Assisted in the design and development of Power BI dashboards to monitor sales, inventory, and marketing performance for multiple clients.
- Created data models using Power Query to connect various data sources (Excel, SQL, and APIs) to Power BI for streamlined reporting.
- Developed customized reports with visualizations like bar charts, line graphs, heat maps, and pie charts to help non-technical users understand key business metrics.
