From**Ethan Lee****Motivation Letter****Dear Internship Recruitment Team at Tesla,**

I am excited to apply for the Engineering Internship at Tesla. Your unwavering commitment to revolutionizing sustainable energy aligns with my passion for innovation and environmental responsibility. As a junior pursuing a degree in Mechanical Engineering at Stanford University, I am eager to contribute my skills to Tesla's groundbreaking projects.

Last year, I led a team project at Stanford to design a cooling system for electric vehicle batteries, achieving an 18% improvement in thermal efficiency during simulations. Additionally, my summer internship at Rivian honed my skills in CAD modeling and materials testing, providing hands-on experience in electric vehicle systems and preparing me to contribute effectively to Tesla's mission.

Tesla's achievements, such as the Model 3's accessibility and the development of the Supercharger network, inspire me to contribute to advancing sustainable transportation. I am particularly impressed by the strides made with Tesla's Gigafactories, which demonstrate an incredible integration of engineering and environmental stewardship.

I would be honored to bring my skills and drive to Tesla's innovative team. Thank you for considering my application. I can be reached at ethan.lee@stanford.edu or 650-555-0923 and look forward to the opportunity to contribute to Tesla's vision for the future.

Sincerely,

Ethan Lee
