

Pain Management Anesthesia Technician

Emily Stone

Professional summary

A highly trained anesthesia technician specializing in pain management procedures with extensive experience in administering and assisting with chronic pain relief treatments, including nerve blocks and epidurals. Adept at operating and troubleshooting advanced anesthesia equipment to ensure patient comfort, safety, and optimal results. Skilled in patient education, preoperative preparation, and providing compassionate care during pain management interventions.

Experience

Pain Management Anesthesia Technician

March 2021 - Now
Pain Relief Medical Center / Los Angeles, CA

- Assist anesthesiologists during pain management treatments, ensuring accurate dosing and timely administration.
- Monitor patients' vital signs and anesthesia depth throughout the procedure, adjusting equipment as necessary.
- Provide clear, reassuring communication to patients before, during, and after procedures to ensure comfort and reduce anxiety.
- Educate patients on pain management techniques, expected outcomes, and post-procedure care instructions.

Anesthesia Technician

January 2018 - February 2021
Beverly Hills Hospital / Los Angeles, CA

- Monitored and adjusted patient anesthesia levels during various surgical and pain management procedures.
- Supported postoperative care by monitoring patient recovery and assisting with anesthesia-related queries.
- Maintained a sterile and efficient operating environment, adhering to all safety protocols.
