- Construction Safety and Risk
 Management, American Society of Civil
 Engineers, September 2023

PROFESSIONAL SUMMARY

Results-driven Junior Civil Engineer with a passion for sustainable infrastructure and urban planning. Experienced in site development, construction management, and ensuring compliance with zoning laws and regulations.

EXPERIENCE

Junior Civil Engineer

2025 - Now

Urban Development Co., Chicago, IL

- Assist with the design and development of civil engineering projects, including roads, drainage systems, and residential developments.
- Prepare construction documents and drawings, ensuring compliance with building codes and environmental regulations.
- Conduct site inspections and surveys to evaluate project progress and ensure quality control.
- Work with senior engineers to assess project timelines, costs, and risks, ensuring optimal resource allocation.

Civil Engineering Intern

2024 - 2025

City of Chicago Engineering Department, Chicago, IL

- Assisted in the preparation of reports and documentation related to city infrastructure projects.
- Supported engineers in drafting design plans and conducting environmental assessments.
- Collaborated with construction teams to ensure adherence to project schedules and safety standards.
- Participated in the planning and design of sustainable urban projects, including green spaces and stormwater management systems.

SKILLS

Site development and construction management

Proficient in AutoCAD, Revit, and Civil 3D

Knowledge of environmental regulations and sustainability practices
