Security best practices (IAM, encryption, VPC design)	**Expert**
Stakeholder communication and leadership	**Expert**
High availability and disaster recovery planning	**Expert**

AWS Solutions Architect

PROFESSIONAL SUMMARY

Solutions Architect with experience designing scalable, cost-efficient, and secure solutions using AWS cloud services. Expertise in cloud migration, infrastructure automation, and system architecture, aiming to leverage my skills in cloud-based solutions to improve business efficiency.

EXPERIENCE

AWS Solutions Architect, Amazon Web Services (AWS), Seattle, WA

March 2021 - Now

- Lead the architecture and implementation of AWS cloud solutions for enterprise clients across various industries.
- Design and implement cloud migration strategies to optimize costs and enhance scalability.
- Implement best practices for security, including IAM roles and policies, VPC setups, and encryption.
- Coordinate with development and operations teams to ensure smooth transitions from on-premise to cloud infrastructure.

Cloud Solutions Engineer, Microsoft Corporation, Redmond, WA

August 2017 - February 2021

- Assisted in the migration of large-scale applications to the AWS cloud.
- Developed solutions using serverless architecture, ensuring cost efficiency and high availability.
- Troubleshot and optimized cloud infrastructure performance to minimize downtime and costs.
