MICHAEL BROWN

Devops Engineer

michael.brown@gmail.com

United States, Seattle, WA 📀

SKILLS

CI/CD Pipelines: Jenkins, GitLab, CircleCI Expert

Cloud Platforms: AWS, Azure Expert

Containerization: Docker, Kubernetes Expert

Infrastructure as Code: Terraform, Ansible Expert

Monitoring & Logging: CloudWatch, Prometheus, Grafana Expert

Scripting Languages: Python, Bash Expert

Version Control: Git, GitHub Expert

HOBBIES

- Tech Blogging
- Cycling

PROFESSIONAL SUMMARY

Recent graduate with a Bachelor's degree in Information Systems and foundational knowledge in cloud infrastructure, CI/CD pipelines, and containerization. Eager to apply academic learning in a real-world DevOps environment.

EDUCATION

Bachelor of Science in Information Systems, University of Washington, Graduated: May 2025

• Capstone Project: Developed a cloud-based application with continuous integration and automated deployment using Jenkins and AWS.

Certifications

- AWS Certified Cloud Practitioner, March 2023
- Docker Certified Associate, February 2023
- Kubernetes Fundamentals (CKA), April 2023

EXPERIENCE

DevOps Intern

CloudTech Innovations, Seattle, WA

June 2025 - August 2025

- Assisted in automating cloud infrastructure provisioning using Terraform and AWS services.
- Supported the setup and maintenance of CI/CD pipelines, helping reduce deployment times by 25%.
- Created documentation and runbooks for automation processes, enhancing team
 productivity.

IT Intern - Cloud and DevOps Team

TechWave Inc., Seattle, WA

June 2024 - August 2024

- Helped with configuring cloud services on AWS for dev and staging environments.
- Participated in building Docker containers and setting up container orchestration with Kubernetes.
- Collaborated with engineers to monitor system performance and resolve basic issues in production.
