To Ms. Deveraux

Lockheed Martin

Dear Ms. Deveraux,

I am applying for the Quality Assurance Inspector role at Lockheed Martin's Marietta facility. I have over eight years of aerospace manufacturing experience and hold AS9100 auditor training, as well as IPC-A-610 certification.

At Gulfstream Aerospace, I review wire harnesses, bonding procedures, and structural assemblies for conformity with engineering drawings. I'm skilled with nonconformance documentation and MRB coordination, especially during FAI reviews.

Lockheed's legacy in advanced aerospace systems and your commitment to precision engineering resonate with my professional background. I'd welcome the chance to uphold quality standards in such an impactful environment.

Thank you for your consideration.

Sincerely,

Robert Miles
