KEVIN MORALES

Fabrication Welder

📞 (918) 555-7124

✉ kevin.morales.weld@gmail.com

📍 United States, Tulsa, OK

📜 Professional summary

Detail-oriented Fabrication Welder with experience in metal fabrication, blueprint interpretation, and MIG/TIG welding techniques. Skilled in producing high-precision components for industrial equipment, structural frames, and custom metalwork.

⚡ Experience

April 2018 - Now
Senior Fabrication Welder
John Zink Hamworthy Combustion, Tulsa, OK

- Fabricate and weld pressure vessels, stacks, ducts, and industrial parts using MIG, TIG, and flux-core methods.
- Interpret complex blueprints and welding symbols to ensure dimensional accuracy and compliance with design specifications.
- Operate CNC plasma and laser cutting machines to prepare materials for welding and assembly.
- Train and mentor junior welders on welding procedures, fabrication tools, and safety protocols.

June 2014 - March 2018
Welder/Fabricator
Midwest Manufacturing, Broken Arrow

- Welded mild steel and aluminum parts for commercial and residential metalwork applications.
- Conducted material layout and cutting based on customer blueprints and CAD drawings.
- Used grinders, brakes, and shears for precision shaping and finishing of metal components.

July 2012 - May 2014
Entry-Level Welder
Ace Metalworks, Sapulpa

- Assisted in the fabrication and assembly of custom metal furniture and signage.
- Performed tack welding, grinding, and metal polishing under supervision.

🎓 Education

Diploma in Welding Technology, Tulsa Technology Center, Graduated May 2012

Certifications

- AWS Certified Welder – Structural Steel (D1.1) – American Welding Society, 2023
- OSHA 30-Hour Construction Safety and Health – U.S. Department of Labor, 2022
- Forklift and Crane Operator Certification – 2021

🚀 Skills

MIG, TIG, and Flux-Cored Arc Welding	★★★★★
Structural Steel and Sheet Metal Fabrication	★★★★★
Blueprint Reading & Weld Symbols	★★★★★
CNC Plasma and Laser Operation	★★★★★
Layout, Fitting, and Tacking	★★★★★
