

INDUSTRIAL ENGINEER

Ethan Morales

COVER LETTER

Dear Hiring Manager,

I am writing to express my interest in the Industrial Engineer position at ABB Inc. With over four years of experience optimizing manufacturing processes at General Electric and a strong background in lean systems, I am confident in my ability to contribute to your mission of building more efficient and sustainable industrial solutions.

In my current role at GE, I led a cross-functional initiative that reduced production costs by 15% through lean implementation and factory layout redesign. I also conducted detailed time studies and workflow analysis, which helped eliminate bottlenecks and improve labor allocation. My hands-on experience with AutoCAD, SolidWorks, and Six Sigma methodologies has allowed me to design and execute changes that improved both output and employee safety.

What draws me to ABB is your global commitment to innovation in automation and electrification. I'm particularly impressed by your work on digitalizing manufacturing operations and believe my skills in process improvement, data analytics (Minitab, Excel), and cross-department collaboration will align well with your goals.

I would welcome the opportunity to further discuss how my background can support your team. Thank you for considering my application. I look forward to the possibility of an interview.

Sincerely,

Ethan Morales
